

The Coordination Operating System For The Social Sector

The Problem

Today NGOs operate like islands.

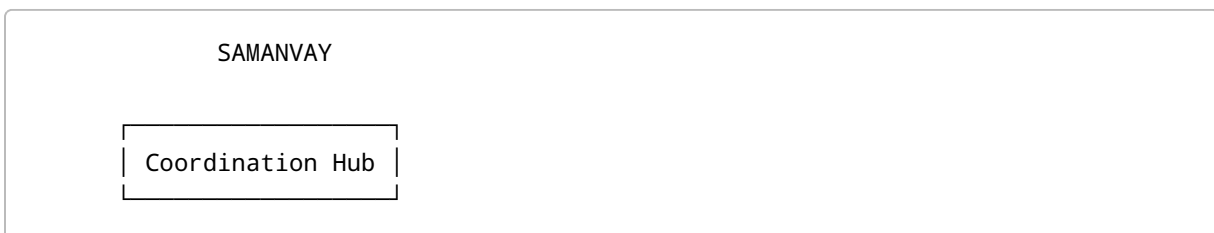

Result:

- Resources remain unused
 - Volunteers remain idle
 - Donors lose trust
 - NGOs duplicate effort
-

The Solution

Samanvay creates a coordination layer.

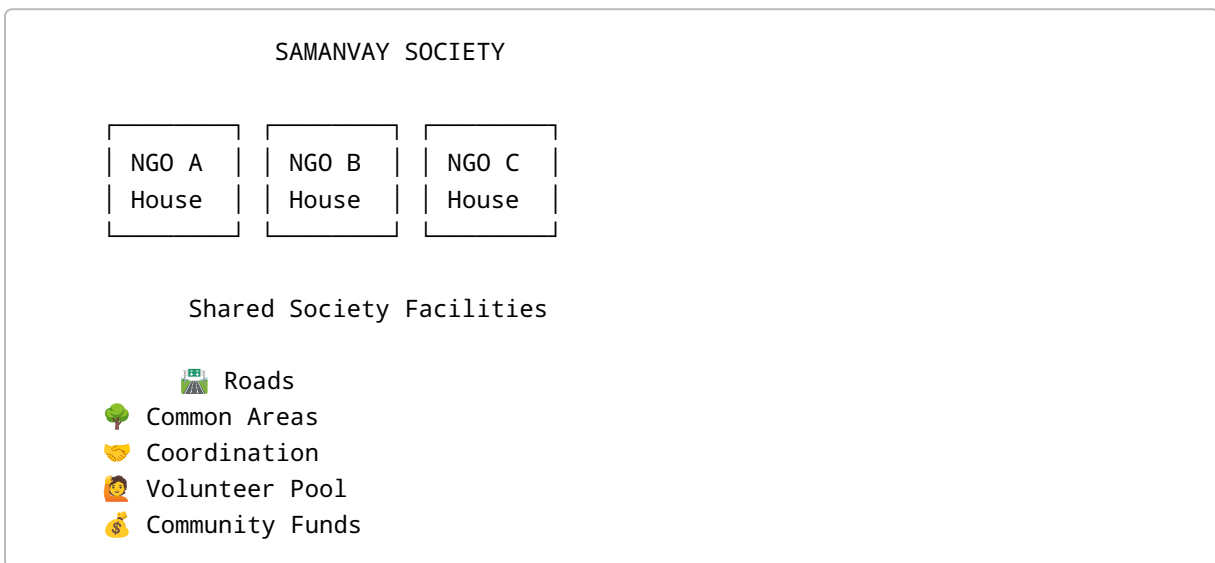

Organizations remain independent.

The platform enables collaboration.

Think Of It Like A Housing Society

Samanvay does NOT own NGO houses.

It provides the infrastructure.

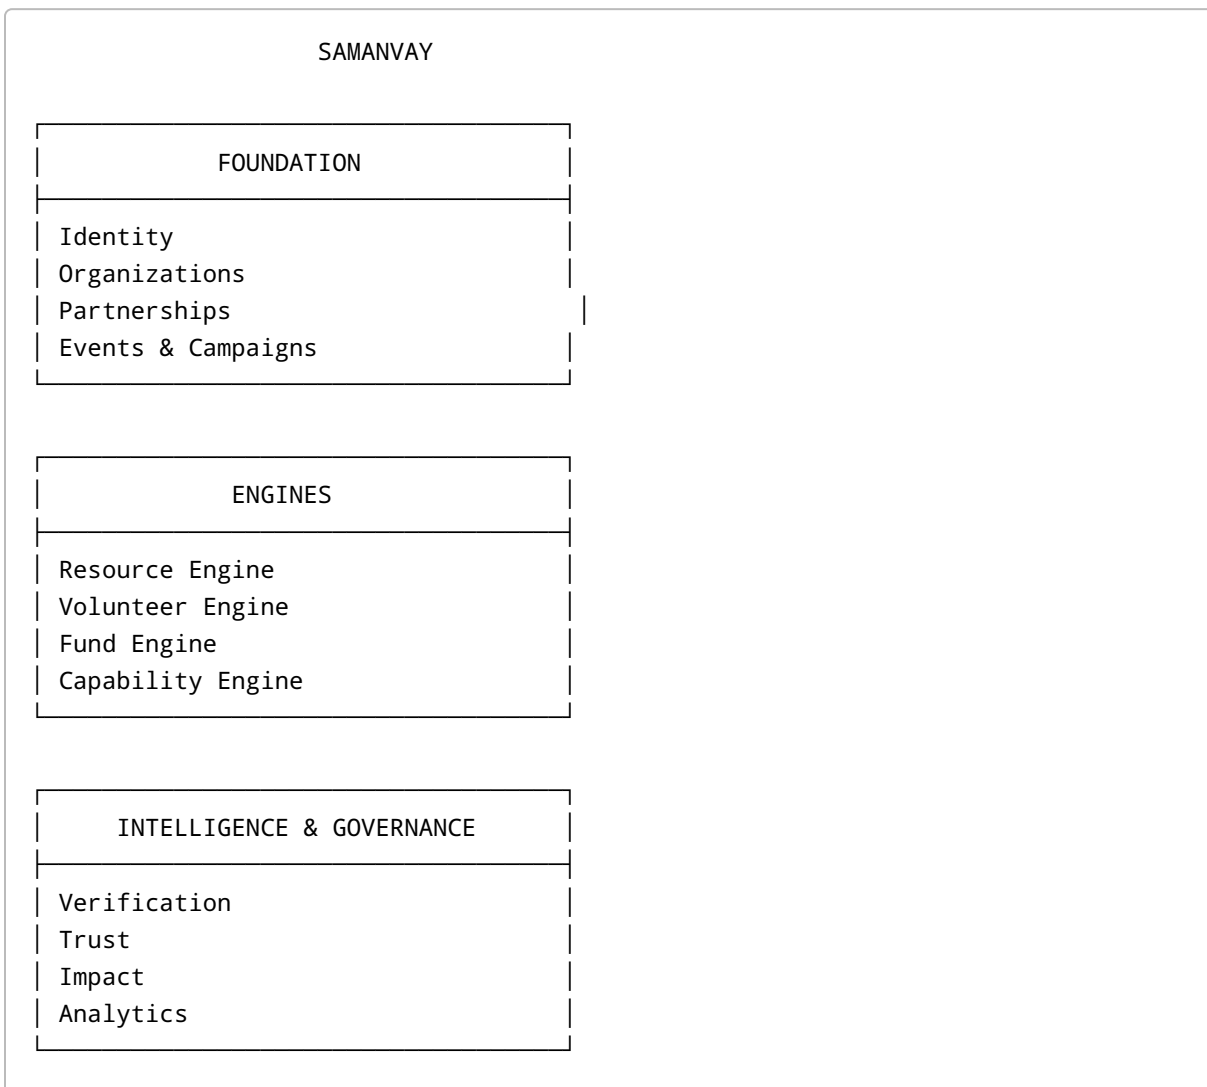

Core Principle

OWNERSHIP ≠ COORDINATION

NGOs own resources.

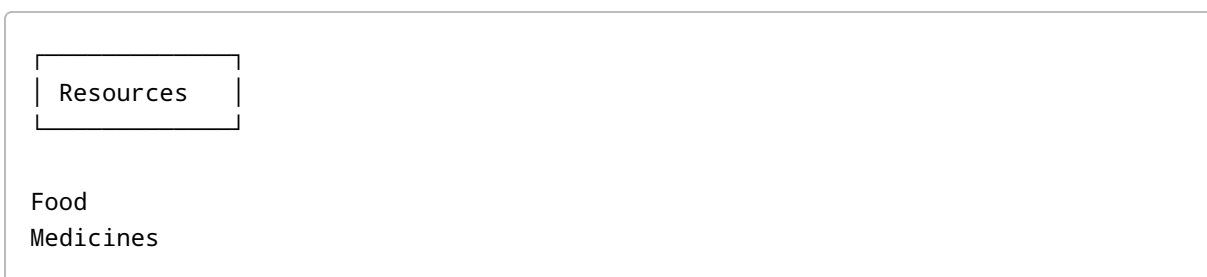

Samanvay coordinates resources.

The Platform

The Four Assets

Everything revolves around four things.

Equipment
Vehicles

Volunteers

Doctors
Teachers
Drivers
Coordinators

Funds

Treasury
Campaigns
Donations

Capabilities

Medical Teams
Legal Aid
Disaster Response

Engine 1

Resource Coordination Engine

Need

↓

Discovery

↓

Offer

↓

Approval

↓

Transfer

Example:

NGO B
Needs 100 food packets

Engine Finds

NGO A
Has surplus food

Offer Sent

Approved

Transferred

Engine 2

Volunteer Coordination Engine

Need

Matching

Invitation

Acceptance

Assignment

Example:

Medical Camp

Needs:

5 Doctors

2 Nurses

↓

Matching Engine

↓

Recommended Volunteers

↓

Acceptance

↓

Event Assignment

Engine 3

Fund Allocation Engine

Donation

↓

Fund

↓

Budget

↓

Expense

↓

Report

Example:

Community Fund

Collected
₹10,000

Spent
₹6,000

Remaining
₹4,000

Engine 4

Capability Coordination Engine

Not all help is inventory.

```
Need Legal Aid
↓
Find NGO With Legal Team
↓
Offer
↓
Approval
↓
Deployment
```

Examples:

 Legal Aid

 Medical Expertise

 Disaster Response

 Counseling

Ownership Domains

Everything belongs to one of three domains.

PRIVATE

Owned by NGO.

Only NGO controls.

SHARED

Owned by Samanvay.

Governed by platform.

COLLABORATIVE

Temporary joint ownership.

Created during coordination.

Destroyed after completion.

Events Are The Center

Everything eventually becomes an event.

Medical Camp

Food Distribution

Fundraiser

Blood Drive

Emergency Relief

Events consume:

Resources
Volunteers
Funds
Capabilities

Events produce:

Reports
Verification
Impact

Future Systems

After MVP.

Verification System

Trust Scores

Impact Ledger

Analytics

Donor Dashboard

Community Resource Pools

Fraud Detection

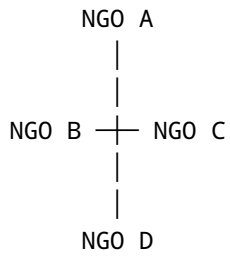

What Success Looks Like

Before Samanvay:

NGOs work alone.

NGO A NGO B NGO C

After Samanvay:

Powered By Samanvay

Resources move faster.

Volunteers find opportunities.

Donors trust the system.

Organizations collaborate effectively.

NORTH STAR

"We are not building software for NGOs.

We are building the coordination infrastructure that allows independent organizations to work together."
